

To our patients insured through Sequoia Physicians Network:

On July 18<sup>th</sup>, 2016, the physicians of Women's Care Medical Group joined Stanford Healthcare.

We remain committed to practicing the same great quality of medical care at Sequoia Hospital and are now supported by the vast resources of Stanford Medicine and Lucille Packard Children's Health. All of our contracting and billing has been assumed by Stanford and efforts are ongoing to continue healthcare contracts that allow us to provide care for you at lower cost to you.

Whether you will see us "in network" or use your "out-of-network benefits", we pledge to provide the continuity of care and personal attention you have come to expect from us.

There may be some confusion during this transition time, and for that we physicians will apologize; many administrators are involved both in the insurance company and in the Medical Group to ensure that your needs are protected. We look forward to seeing you for all your obstetric and gynecologic care in the years ahead.
